Recruitment Section, Human Resources Department
Playtorium Solution Company Limited
349 Vibhavadi RangsitRoad, Chatuchak, Bangkok 10900

Dear Sir/Madam:

I write in response to your advertisement for a Software Engineer which I my friend shared ,January 13, 2022. I believe my experience and computer language skills can make a new change for your company with a user-friendly interface design, style sheet creating skills, and the other requisites that make me a suitable candidate for this job.

This year I will graduate from Chulalongkorn University with a Bachelor of Computer Science. You will notice from my resume that I have worked and collecting experience in Functional programming languages, web development, and Android/iOS application development that would be relevant for the position you advertise.
I developed my communication skills, especially spoken English, through communicating with a foreign co-worker when I interned at Bitkub.
I am skilled in using Figma to implement application UI. moreover, I have learned how to develop the user-experience for user interface designing in Bitkub when I interned.

I believe I would fit the style, approach, and culture of your company. Your company motto and reputation for privacy standards in your customer are things about your company that I admire.

I hope I can discuss this matter further with you in an interview in the near future. You can contact me on my mobile any time or leave a message on my E-mail address any time. I am looking forward to hearing from you.

Yours faithfully,

Sahasawat Eungwanitchyaphan

Enc. Resume

Sahasawat Eungwanitchaphan
